Discover the latest innovation from Universal Filaments. Renowned for our expertise in high-quality brushware, we are proud to introduce our advanced range of paintbrush filaments, engineered for superior performance and durability.

Crafted with precision and innovation, our chemically tapered and synthetic bristle filaments are designed to deliver exceptional painting results. Experience unmatched smoothness, control, and precision with our cutting-edge filament technology.

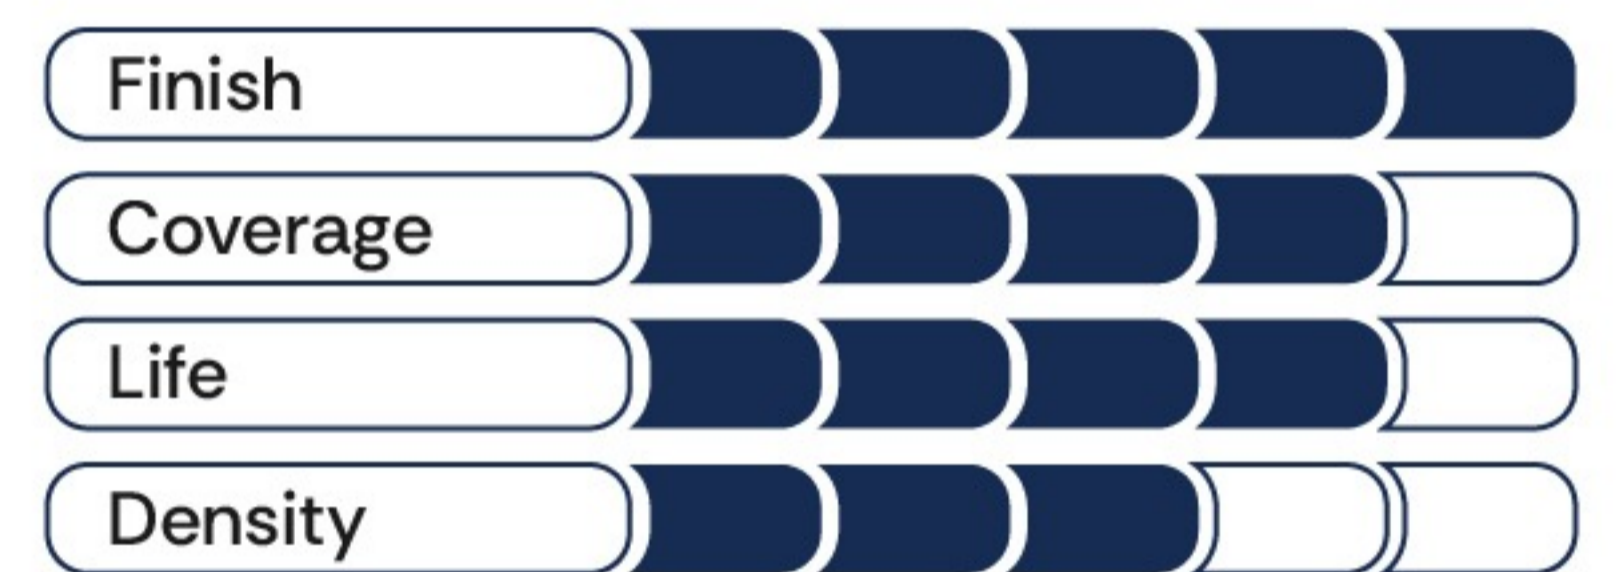

BristleX

- Filament mixture replicating hog bristle traits for paintbrushes
- Offers high paint pickup and smooth release onto surfaces
- Long-lasting and resilient, suitable for prolonged use
- Facilitates easy painting and cleaning

ProX

- Ideal for professional painters, crafted from top-quality raw materials
- Perfectly balanced blend of deep tapered and flagged filaments ensures optimal finish
- Offers excellent coverage & finishing, surpassing the professional standards
- Specialized stabilization enhances material stiffness & performance

TipX

- Solid round filaments offer long life and strong bend recovery
- Deep taper level results in smooth paint release for smooth strokes
- High-quality materials ensure durability and resistance to wear
- Specialized stabilization enhances material stiffness & performance

TetraX

- Strikes a perfect balance between performance and value
- Flagged filaments for enhanced finish by removing brush marks
- Lighter by almost 30% while still retaining high performance
- Provides excellent coverage and finish, albeit with a slightly reduced operating life

HolleX

- Crafted from polyester for remarkable durability and versatility
- Unique hollow design enhances paint retention and coverage
- Lightweight material specifically designed for DIY applications
- Can be mechanically flagged to enhance finishing
